

Eloy Aguilar

Senior Data Engineer

Azure | Fabric | Databricks | Snowflake | AI Data Solutions

Monterrey, Nuevo León, México

LinkedIn Profile

Professional Summary

Senior Data Engineer with 3+ years of experience designing, modernizing, and operating enterprise-scale data platforms on Microsoft Azure, Snowflake, Databricks, and Microsoft Fabric.

Specialized in data architecture, governance, ETL/ELT development, Python engineering, enterprise analytics, AI-ready data preparation, cloud platform administration, cloud infrastructure management, and data platform modernization.

Experience

Senior Data Engineer — Femsa Servicios

Jul 2026 - Oct 2026

- Developed Databricks notebooks for process automation and operational efficiency.
- Built internal tools to automate secure data access and data management processes.
- Orchestrated data pipelines and developed datasets using Azure Data Factory.
- Administered and optimized Snowflake database environments.
- Managed development and production environments ensuring stability, governance, and reliability.
- Maintained technical documentation and operational standards.
- Administered Azure Storage and container-based data environments.
- Extracted, transformed, and prepared data to support AI agents and intelligent automation solutions.

Senior Data Engineer — Daltum Systems

Jun 2025 - Jul 2026

- Migrating Azure Data Factory pipelines to Microsoft Fabric.
- Developing Python notebooks and orchestration pipelines.
- Implementing Medallion Architecture (Bronze, Silver, Gold).
- Building Lakehouses and governance standards.
- Leading platform architecture and modernization initiatives.
- API integrations to Fabric.
- Data lake, Lakehouse and warehouse creation and management.

Data Engineer — Celestica

Nov 2024 - Jul 2025

- Database administration and maintenance.
- ETL and pipelines management and orchestration.
- SQL development and optimization.
- JavaScript development.
- Data analysis and reporting support.

Help Desk Lead — Global Business Technologies

Apr 2023 - Apr 2024

- Database migrations and backups.
- Network and VPN administration.
- Hypervisor and virtual server maintenance.
- Google Workspace administration.
- Infrastructure and hardware troubleshooting.

Featured Projects

- Microsoft Fabric Medallion Architecture Implementation
- Azure Data Factory to Microsoft Fabric Migration
- Enterprise Master Orchestration Pipeline
- Microsoft APIs and External API Integrations
